

Previous CBC and Iron Follow-up

Patient Name: Anika Rao

Date: 2026-01-12

Hemoglobin: 11.4 g/dL

WBC Count: 7600 cells/uL

Platelet Count: 438000 cells/uL

RBC Count: 4.08 million/uL

Mean Corpuscular Volume: 78 fL

Ferritin: 18 ng/mL

Interpretation:

Mild microcytic anemia is present. Platelet count is mildly elevated, which may be reactive in the setting of iron deficiency. White blood cell count is within range.

Doctor Note:

The clinician documented fatigue and heavier menstrual bleeding as possible contributors. Iron-rich diet and repeat CBC were discussed.
