

Observation Stay for Dehydration

Patient Name: Leona Voss

Date: 2025-01-27

Admission Reason:

Lightheadedness and reduced oral intake after 3 days of viral gastroenteritis symptoms.

Hospital Course:

Patient received intravenous fluids and electrolyte monitoring. Blood pressure medications were temporarily held during observation. Symptoms improved and oral intake was tolerated.

Discharge Diagnoses:

- Mild dehydration, resolved
- Hypertension
- Type 2 Diabetes
- Chronic kidney disease stage 3a

Discharge Instructions:

Resume home medications except hydrochlorothiazide until primary care review. Maintain hydration and return for reduced urine output, confusion, or persistent vomiting.
